Subject: Do not put limits on use of Natural Gas

External Email

- I oppose any limitation on the use of Natural Gas for heating and or powering our homes.
- The UTC study has not been completed to know if the electrical infrastructure can handle the additional load.
- Natural Gas is a clean energy source. Europe has deemed Natural Gas as “Clean”.
- With a potential world war before us, removing an energy source is not good policy.
- Energy costs will rise if natural gas is eliminated.
- Consumers prefer energy choice.
- There is natural gas burning equipment that is high efficiency and should be considered before removing an energy source.
- The costs to consumers will be extensive and any new residential building costs will rise \$20k putting some buyers out of range to purchase.
- The fiscal note may be low but the cost to consumers will be insurmountable.
